

HAMZA YOUNAS

hamzayounas256@gmail.com | +92-3364527513 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Innovative Front-End Developer specializing in React.js, with a proven track record in crafting dynamic dashboards, admin panels, and CRM systems. Proficient in API integration and core web technologies, including JavaScript and Redux Toolkit. Experienced in developing user-centric solutions, such as accounting interfaces and AI-driven diet recommendation apps.

Strong communicator and collaborative team player, dedicated to delivering efficient and engaging user experiences.

Projects

Customer Relationship Management System | American Electronics

April'24 - Present

Developed a user-friendly and efficient accounting software interface using React.js, enhancing the checkout experience for customers and streamlining sales processes for retailers.

- Incoming & Outgoing Goods Management
- Sales Efficiency

Diet Recommendation - AI

June'24

The application includes five key modules: a homepage with diet content, a BMI assistant for personalized diet recommendations, a disease assistant suggesting diets for reported conditions, a reports section for medical records, and a contact page.

- Diet Recommendation
- Diet For Patients
- Medical Reports

Leave Management System

Sep'24

Designed and developed a comprehensive Leave Management System using React.js, enabling employees and administrators to efficiently manage leave requests, approvals, and tracking.

- Leave Balance Tracking
- Multiple Leave Types
- Automated Approval Workflow

Billilo – Pet App

Nov'24

Developed a React-based pet-related application allowing users to post and view listings for lost, found, adopted, and for-sale pets. Integrated sections for animal shelters and nearby vets, enhancing user experience and accessibility.

- Lost & Found Pet
- Adopt & Sell Pet
- Animal Shelter & Vets Nearby
