SUMMARY

Full-Stack Software Engineer with proven experience in **React.js, Next.js, Django, FastAPI, Node.js, Express.js & Nest.js**. Skilled in building **scalable web applications, high-performance APIs, and efficient database systems** with **PostgreSQL, MySQL & Mongo DB**. Adept at collaborating across teams, solving complex problems, and delivering clean, user-focused products. Currently building **Send Scale**, a next-generation cold email automation platform.

TECHNICAL SKILLS

- **AI Prompt Engineering**
- **Languages:** Python, JavaScript, C, C++
- **Frontend:** React.js, Next.js
- **Backend:** Django, DRF, Node.js, Express.js, Nest.js, Web Sockets, REST API Development, 3rd Parties API integrations
- **Databases:** PostgreSQL, MySQL, Mongo DB
- **Architecture & Patterns:** MTV, MVC, Micro-services Architecture
- **Tools & Platforms:** Visual Studio Code, Cursor, Postman, Table Plus, Github, Jira, Asana, Slack, Docker and many more.

SOFT SKILLS

Problem Solving | Communication | Teamwork | Time Management | Adaptability | Continuous Learning | Cursor Prompt Engineering

WORK EXPERIENCE

Trottk

Software Engineer | Jun 2025 – Present

- Leading development of Send Scale, a cold-email automation SaaS platform
- Developing backend services using Node.js, Express.js, and Nest.js
- Building interactive dashboards and web interfaces using Next.js
- Designing and optimizing PostgreSQL and MongoDB database models
- Collaborating with cross-functional teams to ensure smooth product delivery
- Ensuring system scalability, performance, and clean development standards

Hisab Kar Lay

Associate Software Developer | Mar 2024 – Jun 2025

- Developed and optimized REST APIs using Django and Django REST Framework
- Built admin panels, CRMs, POS systems, and dashboards using React.js & Redux
- Improved application performance, security, and response time
- Integrated third-party APIs and authentication modules
- Implemented UI/UX enhancements with Tailwind CSS
- Assisted in database structure optimization and deployment support
- Participated in team collaboration, sprint planning, and feature improvements

Ebryx

Web Development Intern | Sep 2023 – Nov 2023

- Built responsive and reusable front-end UI components using React.js.
- Enhanced user experience and interface performance.

EDUCATION

Minhaj University Lahore

Bachelor of Science in Computer Science | **Mar 2020 – Feb 2024**

PROJECTS

Sugar Pixels AI

Tech Stack: FastAPI, React.js, PostgreSQL, Redis, Third-Party APIs, 10web

Description:

Developed a full-stack workspace automation platform that integrates data from multiple third-party APIs to dynamically generate, manage, and deploy websites. Implemented operations for workspace and website management, role-based access, collaboration tools, and subscription/billing features. Optimized API performance using asynchronous FastAPI workflows and improved scalability through Redis caching.

Send Scale – Cold Email Automation SaaS

Tech Stack: Next.js, Nest.js, Node.js, PostgreSQL, MongoDB, Redis

Description:

Built a SaaS cold-email automation platform supporting email warm-up, multi-inbox unification, automated outreach campaigns, and detailed analytics dashboards. Designed scalable back-end services with Nest.js, integrated multi-provider SMTP handling, and optimized campaign performance. Implemented subscription tiers, campaign scheduling, and deliverability tracking.

CRM – Customer Relationship Management Dashboard

Tech Stack: React.js, Redux/Context API, REST APIs

Description:

Developed a responsive CRM front end for managing sales pipelines, customer transactions, lead tracking, and team activities. Built reusable, modular UI components to improve maintainability and enhance the user experience. Improved workflow efficiency by implementing dynamic filtering, sorting, and real-time status updates.

Diet Recommendation System (AI-Powered)

Tech Stack: React.js, Hugging Face APIs, Node.js, Tailwind/Material UI

Description:

Created an AI-driven diet recommendation platform that analyzes BMI and health conditions using Hugging Face models. Implemented personalized meal recommendations, nutritional insights, and condition-specific dietary plans. Designed an intuitive UI for seamless user interaction and improved accessibility.

Pet App – Pet Adoption & Veterinary Services Platform

Tech Stack: React.js, Django, Django REST Framework, PostgreSQL

Description:

Developed a full-stack platform enabling pet adoption, veterinary appointment booking, and lost-and-found pet tracking. Built secure authentication, user dashboards, and admin tools for managing pets, services, and reports. Implemented a scalable backend with Django and optimized API performance for smooth user experience.

E-Commerce Application (MERN Stack)

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT Auth

Description:

Built a secure MERN-based e-commerce application featuring product listings, advanced search, cart management, order processing, and checkout workflows. Implemented authentication/authorization using JWT, integrated payment gateways, and optimized UI/UX for faster product browsing and conversions.

Data Management System (MERN Stack)

Tech Stack: MongoDB, Express.js, React.js, Node.js, Redux

Description:

Developed a scalable data management system with modules for real-time data updates, inventory tracking, sorting, filtering, and advanced data visualization. Designed efficient database models to support high-volume operations and implemented responsive UI components to enhance usability.

AWARDS

- Awarded Laptop Prime Minister Scheme – 2017
